PROFESSIONAL SUMMARY

Highly motivated Full Stack Developer with a strong foundation in building scalable web applications from scratch, seamless API integration, and database management. Proficient in modern frontend frameworks, robust backend languages, and agile methodologies to deliver efficient, user-centric software solutions. Seeking to leverage my end-to-end development skills to contribute to innovative projects and drive impactful technical solutions in a dynamic team environment.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Self-Employed

Feb 2026 – Present | Lahore, Pakistan

- **Architect and build** complete full-stack web applications independently from scratch, managing everything from UI/UX design to backend deployment.
- **Develop** secure and optimized RESTful APIs, connecting modern frontend components with robust relational/non-relational databases.
- **Implement** clean code practices, error handling, and MVC architecture to ensure applications are scalable and easily maintainable.
- **Demonstrate** strong self-direction and technical agility by independently researching, troubleshooting, and adopting modern technologies and frameworks.
- **Design** and deploy end-to-end features, optimizing database queries and application logic to achieve high performance and seamless user experiences.

PROJECTS

MERN Stack E-Commerce Platform

Apr 2026

Developed a fully functional, end-to-end E-Commerce web application that enables seamless shopping experiences for users and robust management tools for store operators. The application features a dynamic product catalog with advanced filtering and search capabilities, an interactive shopping cart, secure user authentication, and a dedicated admin dashboard for managing inventory, tracking orders, and handling user profiles. Implemented responsive frontend designs and optimized RESTful API endpoints to ensure fast loading times and a smooth user experience across all devices.
